- 2.4 I responded to DeTar Hospital Navarro, 506 E San Antonio Street, Victoria, Texas, and began my investigation.
- 2.5 I arrived at DeTar Hospital Navarro at approximately 8:52 PM and met with Victoria County Sheriff's Office Chief Deputy Roy Boyd, Jail Captain Charles Williamson, Jail Lieutenant Bryan Irvin, and Crime Scene Unit Lieutenant John Davis.
- 2.6 Upon my arrival, I was directed to the hospital station where Clinton Joseph Harrington's body was.

- 2.8 Harrington was on a yellow "backboard" that was placed on a hospital bed.

2.10 I observed an intubation tube exiting from Harrington's mouth, an IV in his right arm, and an IV in his right shin, along with various medical leads attached to his body.

2.11 Upon pulling up on Harrington's shirt, I could see indentations on Harrington's chest that I know from training and experience to be from the automated CPR machine utilized by EMS personnel.

2.12 There were no other visible scratches, scrapes, or marks on Harrington consistent with a struggle or fight.

2.13 I took photographs of Harrington as I found him for evidentiary purposes.

2.14 Victoria County Precinct 4 Justice of the Peace John Miller responded to the scene and released the body to Crossroads Mortuary to be transported to the Travis County Medical Examiner's Office for an autopsy.

2.15 Terry Owen from Crossroads Mortuary took custody of Harrington's body, and I assisted him in placing Harrington's body into a body bag, which I then sealed with evidentiary tag #2817222, which I photographed at approximately 9:35 PM.

2.16 I obtained a copy of all DeTar Hospital Navarro paperwork for Harrington related to that night.

2.17 Exhibit S2.P1 is a copy of all DeTar Hospital Navarro paperwork as given to me.

2.18 I advised Captain Williamson that I would need statements from all on-duty personnel at the jail and Captain Williamson advised they were already working on supplements to the jail's reporting paperwork.

2.19 I then responded to the Victoria County Jail located at 101 N. Glass Street, Victoria, Victoria County, Texas, arriving at approximately 9:50 PM.

2.20 At the jail I took evidentiary photographs of the scene as I found it.

2.21 Harrington had been housed in the Medical 1 infirmary cell, which I was advised was under 24-hour video surveillance.

2.22 I was also advised Harrington had shared his cell with Bryant Emil Grady.

2.23 I requested a copy of all jail videos from that night as well as a copy of all reports in reference to Harrington's incarceration.

2.24 I conducted an interview of Bryant Grady in the VCSO Investigations Division interview room. The interview started at approximately 10:37 PM and was video and audio recorded.

2.25 Grady was visibly upset from having found Harrington, whom he said he had shared a cell with for about one week.

2.26 Grady stated to me that Harrington was talking constantly and hallucinating while he was in his cell. Grady said Harrington had been hallucinating for several days.

2.27 Grady said Harrington talked about a lady trying to come down or fall down from the ceiling.

2.28 Grady said Harrington fell earlier in the day and hit his head, but jail staff was not notified. Grady said Harrington said he fell earlier in the day as well, but Grady did not witness that fall.

2.29 Grady said Harrington did not eat his dinner that evening when it was provided.

2.30 Grady said he had talked with Harrington in the past about Harrington "detoxing" off of methadone.

2.31 Grady said he thought Harrington was already dead when he discovered him unresponsive in his cell.

2.32 I asked Grady if he had seen anyone harm or mistreat Harrington and Grady said "no."

2.33 Grady said jail staff responded quickly when he "hit the button" to notify them Harrington needed help.

2.34 Grady described behavior from Harrington that seemed strange to him, including him hitting the walls of his cell with his hands at times.

2.38 At the conclusion of the autopsy, Dr. Bielamowicz advised the preliminary ruling was "pending" as there were more tests/toxicology needed to make a determination.

2.39 Dr. Bielamowicz released a brown paper bag containing the clothing worn by Harrington, designated as Exhibit S2.P3.

3.27 I was provided with extra copies of these three videos, which were sent to Dr. Hannah Bielowicz at the Travis County Medical Examiner's Office in order to assist them with their autopsy determination.

3.28 During my interview with Grady, he stated he believed Harrington had fallen at approximately 11:00 AM, but review of the jail videos indicate the falls happened at approximately 8:53 AM and approximately 9:03 AM.

3.29 At 8:53 AM Harrington rolled off of the side of his bed, but sits up and can be seen talking with Grady shortly after.

3.30 At 9:03 AM Harrington falls from a standing position backwards and strikes his head on the floor of the cell. He had picked up an envelope and an article of clothing and appeared to be walking towards either the table or shower when he lost his balance and fell.

3.31 Harrington appears to retain consciousness the entire time as he can be seen grabbing his head and writhing in pain. Grady immediately gets up and over to check on him at this point.

- S4** 4.1 On Thursday, 03/21/2019, I, Company "F" Texas Ranger John Lingle, received the completed autopsy report for Clinton Joseph Harrington from the Travis County Medical Examiner's Office, which was dated 03/19/2019.

4.2 The official cause of death was determined to be "Complications of Selective Serotonin Reuptake Inhibitor Therapy."

4.3 Other contributing conditions were listed as "Hypertensive Cardiovascular Disease."

4.4 The manner of death was listed as "Natural."

4.5 These determinations were made by Dr. Hannah Bielowicz, Forensic Pathology Fellow, and Dr. Vickie Willoughby, Deputy Medical Examiner.

4.6 Dr. Willoughby noted in her report that Harrington had excess fluid in his lungs (pulmonary congestion), an enlarged heart (cardiomegaly), and mild narrowing (atherosclerosis) of one of the coronary arteries that supplied blood to the heart.

4.7 Dr. Willoughby also noted there was scoliosis of the spine with evidence of surgical repair, and an incidental Meckel's diverticulum (outpouching of the small intestine).

4.8 Toxicology results showed there were no illegal drugs in Harrington's system at the time of his death, and separate toxicology tests were also done to rule out the presence of synthetic cannabinoids and novel psychoactive substances.

4.9 Toxicology testing on postmortem blood did demonstrate an elevated level of fluoxetine and its metabolite (norfluoxetine), in addition to Metoprolol and Hydroxyzine.

4.10 A separate test run through NMS labs detected the presence of aripiprazole, hydroxyzine and its metabolite (cetirizine), and metoprolol.

4.11 Dr. Willoughby stated in her report the cause of the elevated levels of fluoxetine was unknown. She stated that a possible cause could be due to interactions of other medications including aripiprazole and hydroxyzine, which can disrupt the metabolism of these drugs.

4.12 All drugs present in Harrington's system were prescribed to Harrington. Harrington listed Prozac 40mg (quantity 2) on his personal property form at the Victoria County Jail, along with methadone 100mg (quantity 1 ½) and Abilify (Aripiprazole) 5mg (quantity 2).

4.13 See Exhibit S4.P1, Victoria County Jail Personal Property/Currency Report, dated 09/09/2018.

4.14 Harrington was seen by PA-C William Metzger on 10/01/2018 and 10/08/2018, and both of these appointments reference his Fluoxetine prescription while making a note of body tremors.

4.15 Harrington was moved to the infirmary of the Victoria County Jail on 10/06/2018 per Detention Officer Parma due to Harrington shaking and sweating. Jail records stated that Harrington felt he was being "punished" by being placed into an infirmary cell and wanted to go back to the general population.

4.16 Harrington saw Psychiatrist Kimberly Warneke on 10/11/2018, and notes were made about the same noted prescriptions and their amounts. Harrington stated to Warneke that he was not taking Hydroxyzine at home.

4.17 Dr. Warneke made note that Harrington did not appear to have Serotonin Syndrome at that time.

4.18 Other Correctional Managed Care paperwork showed RN Meredith Caruso and LVN's Edna K Larson and Peggy West to have reviewed the prescriptions for Harrington as well.

4.19 See Exhibit S4.P2, Correctional Managed Care Paperwork, for full details.

4.20 In reference to Harrington's methadone detox program, I spoke with Dr. Bielowicz, and she stated ill effects from methadone detox would normally quit in two weeks or less.

4.21 Harrington's methadone detox program ended on 09/26/2018, 31days before his death.

4.22 Dr. Willoughby noted in her report that serotonin syndrome could occur due to the accumulation of toxic levels of serotonin over time.

4.23 Dr. Willoughby stated that in Harrington's case, "It is possible that interactions between these drugs may have contributed to the development of

serotonin syndrome and/or cardiac arrhythmias. A heart that is enlarged by chronic high blood pressure is at an increased risk of developing congestive heart failure and arrhythmias (abnormal heart rhythms), which can cause sudden death)".

4.24 See Exhibit S4.P3, Medical Examiner Report, for full autopsy details.

4.25 I have spoken with Victoria County District Attorney Constance Filley Johnson reference this case, and I will be presenting my findings to the Victoria County Grand Jury in the near future.

4.26 This investigation continues.
